

SmartDRIVE 24X
CD-R RECORDING
SPEED!

VALUE AND VERSATILITY DEFINED

SCRIBE, MediaFORM's latest product entry, provides an affordable desktop CD-R or DVD-R duplication and/or printing solution -- all in a single footprint. As the most versatile duplication system on the market today, SCRIBE offers endless possibilities to automate CD-R or DVD-R duplication and/or printing. The base unit serves as a duplicator, print station, or as a fully integrated duplication and printing system; allowing you to choose drive and print types within one simple-to-use design -- ultimately reducing the overall total cost of ownership.

Choose from three standard system configurations: 1) CD-R, 2) DVD-R, or 3) print station only. Any of the system configurations are designed to accommodate thermal and/or inkjet printers (see: Supported Printer Options). Plus, the SCRIBE is business card and mini-disc compatible, which further maximizes your investment. Not only will the SCRIBE record on business card CD-Rs, but it also prints on all media by utilizing the SCRIBE Business Card Template Kit.

There's nothing else quite like it! The CD-R version includes MediaFORM's exclusive SmartDRIVE, providing intellectual property safeguards coupled with professional audio features. SCRIBE is the complete CD-R or DVD-R premastering, duplication and/or printing solution, offering you ultimate value and versatility at an economical price.

SCRIBE™

FEATURES:

- SmartDRIVE offers intellectual property safeguards
- Copies all current CD formats (audio, data, and video)
- Allows multiple CD images to be stored and duplicated from a local hard disk drive
- Center Pick Robotic Arm with input and output spindles for reliable pick and place handling of all media
- Upgradeable to future CD-R / DVD-R drive technology
- Asynchronous Functionality allows the unit to record and print simultaneously
- **EXCLUSIVE!** Relay mode allows multiple masters and multiple copies to be recorded and printed in a single, continuous, unattended process
