

THE WORLD LEADER OF ADVANCED CD-R/DVD-R
DUPLICATION, PRINTING AND PUBLISHING SYSTEMS.

Spectrum 2 Color Thermal Transfer Printer

Quality thermal printing is affordable and easy to use with MediaFORM's Spectrum 2 color thermal transfer printer. Offering both monochrome and process-color printing, the Spectrum 2 handles most media sizes and surfaces with superior 600 dpi quality. Plus, the Spectrum 2 offers our exclusive "Quick-n-Easy" ribbon change design, the ribbon maximizer for prolonged ribbon life, and automatic notification to indicate when the printer ribbon needs to be replaced. Additionally, Spectrum 2 features secure, durable media trays and *Spectrum Designer* intuitive label design software and electronic templates.

The Spectrum 2 can be used as a standalone media (CD-R / DVD-R) printer or it can be easily integrated with most duplication systems and printing stations offered by MediaFORM for automated printing.
